

Creative Interest Assignment

1. Write one paragraph describing a creative interest you have. What makes it distinctive? What possibilities does it offer for creative development? Work in the spirit of the examples you read about in Chapter 2 of *The Nature of Creative Development* – describe your conception of your interest, make it rich, with some details.
2. Review the tables of contents for several journals, such as the *Journal of Public Economics*, *European Economic Review* – whatever journals interest you. Identify at least 2 articles that intersect in some way with your interest, read the abstracts and if possible scan the articles. What have you learned in relationship to your creative interest? Do the readings spark any ideas? Has your interest been slightly altered by this experience?
